Clinical Technology Trends

LTPAC Technology in the News[1]

CMS seeks provider input on LTC's EHR use

February 23, 2015 by Pamela Tabar, Editor-in-Chief

Technology can improve housekeeping practices

January 15, 2015 by Tobi Schwartz-Cassell

Keeping a long-term facility clean takes more than elbow grease

With the exponential realities of airborne and contact illnesses in the long setting, exacerbated by ever-worsening drug resistance to them, industry up with innovative technology to combat pervasive bugs. Here are just a high-tech devices available in today's disinfecting market.

UV light disinfection systems

The widening world of wearables

January 21, 2015 by Pamela Tabar, Editor-in-Chief

Web-savvy seniors have better health literacy: study

December 2, 2014 by Richard R. Rogoski

| REPR

Software reduces psychotropic drug use in seniors with dementia

February 20, 2015 by Richard R. Rogoski

| REPRINTS

Electronic Health Records

Health Information Exchange

Data and Analytics

Patient and Family Engagement

Telehealth and Remote Monitoring

Wearable Technology

Clinical Technology
Considerations

View technology as a tool for care delivery

Focus on building buy-in and education

Use thoughtful but restrained configuration decisions

Be willing to change – don't replicate paper or legacy practices

Consider entire workflow and teamwork

Be targeted in why you are deploying technology

IT Security Trends

HIPAA in the News[2]

Groups hit with record $4.8M HIPAA fine

Patient data popped up on Google

May 8, 2014

Email hack makes for HIPAA breach

'Patient information may be included in the provider's email account,'

October 14, 2014

HIPAA data breaches climb 138 percent

February 6, 2014

HIPAA breach is bad news for 729,000

Health system now to 'expedite' encryption

ALHAMBRA, CA | October 23, 2013

OCR: Be prepared for HIPAA audits

'The onus is on you to prove you had the proper systems in place.'

Third big HIPAA breach

Doc loses unencrypted USB drive

ROCHESTER, NY | May 6, 2013

# Encryption

Mobility and BYOD

Cloud Solutions

Outdated Operating Systems

IT Diplomatic Immunity

Phishing

IT Security Trends
Considerations

Follow trends and developments

Consider risk, likelihood, and impact

Use documented policies and procedures consistently

Ease of use and security usually have an inverse relationship – find balance

Consider security impact of all new projects and efforts

Educate staff on importance of IT security

Wrap Up, Questions, and Discussion
