

How WVCHIP Benefited from the Leverage Condition

History of the WVCHIP Program

WVCHIP provides healthcare coverage to children in working families with incomes too high to qualify for Medicaid but who lack access to affordable coverage, specifically children in families with gross incomes up to 300% of the Federal Poverty Level (FPL), utilizing funding available under Title XXI of the Social Security Act.

WVCHIP was enacted by State Code §5-16b, and was designed to operate with the highest degree of simplicity and governmental efficiency by leveraging existing processes and functions available through other state agencies.

Impact of ACA Requirements

MEDICAID STATISTICAL
INFORMATION SYSTEM (T-MSIS)
WVCHIP did not use a MSIS
reporting system

PROVIDER ENROLLMENT AND
REVALIDATION

Required many changes to
WVCHIP's enrollment process

Leveraging the WV MMIS Implementation

2015: WVCHIP Leadership, in collaboration with WV Medicaid Leadership, merged 2 projects into 1

MMIS PROJECT PROCESSES

- Project Management Plans
- Expanded Configuration Options
- Testing Scenarios and Tools
- Expanded Provider Revalidation
 - Shared Provider Outreach and Workshops
 - Finger Print and Back Ground Checks
- Provider and Member Portal Additions/Enhancements
- Shared and Enhanced Letters and Reports
- Defect Resolution Processes and Tools

Benefits for WVCHIP and Medicaid programs

On January 19, 2016 both programs went live with a new Medicaid Management Information System (MMIS) on the same platform.

WVCHIP

- Quicker Advanced Planning Document (APD) Approval
- Quicker Implementation
- Certified System
- 90% Federal Match

WV MEDICAID

- Accurate and Combined Reporting
- Continuity for Providers and Members
